\* Category-level information indicates the number of test questions answered correctly for relatively small subsets of the questions. Because they are based on small numbers of questions, category scores are less reliable than the official scaled scores, which are based on the full set of questions. Furthermore, the questions in a category may vary in difficulty from one test form to another. Therefore, the category scores of individuals who have taken different forms of the test are not necessarily comparable. For these reasons, category scores should not be considered a precise reflection of a candidate's level of knowledge in that category and ETS recommends that category information not be used to inform any decisions affecting candidates without careful consideration of such inherent lack of precision.

\*\* The range of scores earned by the middle 50% of a group of examinees or appropriate educational level (see interpretive leaflet for details) taking this test during the most recent three academic years. N/C means that this range was not computed because the test was taken by fewer than 30 examinees within the most recent three academic years. N/A indicates that this test section was not taken and, therefore, the information is not applicable.
